TEL: SEUR 01-10

PARIS, le 15 octobre 1952

Dr. A.D. HERSHEY  
Marine Station  
COLD SPRING HARBOR  
Long Island, N.Y.

Dear Hershey,

This is to tell you that the 28 papers presented in Royau-  
mont will appear in the first issue (January 1953) of the vo-  
lume 84 of the Annales de l'Institut Pasteur. You will receive  
galley proofs of your article in a near future together with  
a blank form ordering reprints.

Our phage group is working very actively on problems of  
immunity, lysogenisation and recombination of prophage, so as  
of course of colicine. Unfortunately, nothing very new has  
been discovered since two months!

Please give my best regards to Mrs Hershey.

Very sincerely yours,

A.L.W.

A. LWOFF

P.S.- Would you please give the information concerning the  
colloquium to Visconti.

Would it be possible for you to send us K12 "het" (haploid)  
and K12 "het" diploid or any other diploid ?
